

ESG CERTIFICATION

Guardians of Tomorrow NATURESAFE is an innovative insurance solution designed by JK Underwriting (Fidelitas Group) for responsible companies, protecting both the planet and business. This initiative allows policyholders to align their insurance expenses with sustainability goals.

Wording reserved for Fidelitas clients - policy:
Property ESI200216-LB and subsequent numbering

DAMCO S.R.L

Via Don Mazzolari 1/b, 42012 Campagnola Emilia (RE)

CARBON OFFSET

This certifies that the policy, in accordance with contractual terms, ensures the purchase of carbon credits to offset any carbon dioxide emissions released into the atmosphere as a result of an accidental event affecting the insured property. The coverage provided by this policy is designed to address environmental impact mitigation needs arising from unforeseen incidents, in line with sustainability objectives. By purchasing carbon credits, the policyholder contributes to balancing the carbon footprint associated with the unforeseen event, promoting ecological balance and environmental responsibility.

PREMIUMS4GOOD

This certifies that the policy is part of the Premiums4Good project, where a portion of the premiums paid by policyholders is allocated by insurers to impact investments aimed at generating positive and measurable environmental and social change. Investments include bonds and funds that finance initiatives such as renewable energy development, support for homeless individuals, and improving education in disadvantaged communities. In this way, your policy contributes to building a more resilient future.

QBE is the Lloyd's syndicate that supports the insurance coverage of this policy and has launched this pioneering initiative in the industry since 2016. The insurers aim to expand impact investments responsibly through reliable governance, careful investment selection, and rigorous reporting.

QBE's ambition is to grow these investments to reach USD 2 billion by 2025.
